

21Million

WHITEPAPER

Dive into the future of digital finance with 21Million

21Million is a gold-inspired decentralized cryptocurrency that matches its value with the likes of Bitcoin (BTC), Ethereum (ETH) and other leading cryptocurrencies. Our goal is to create a stable and trustworthy digital store of value that overcomes the volatility of crypto markets and uses it to our advantage.

The stability of 21Million is strengthened by a dynamic exchange relationship with the underlying cryptocurrencies in our community portfolio. This strategy gives our currency a solid foundation and gives users confidence that its value is growing. Every 21Million token exchanged for existing cryptocurrencies in the portfolio swap is 100% burned. This process creates a scalable scarcity and continuously increases the demand for 21Million tokens.

In a world of uncertainty and loss of value, we offer 21Million as a well-designed and flexible way to preserve value in the digital currency space. Become a 21M Token Holder and be part of our movement. Experience the future of new digital value preservation with 21Million and the crypto standard.

Unique features are waiting for you

Community Portfolio

21Million's Community Portfolio is a collection of various cryptocurrencies that cover the value of 21Million tokens. The expansion of assets in the portfolio is done in consultation with the community, which democratically decides which additional cryptocurrencies to include. The portfolio forms the basis for the portfolio swap and offers token holders the opportunity to exchange 21Million tokens for a variety of growing assets. The Community Portfolio will be continuously expanded to increase the coverage ratio and ensure the stability of 21Million. The portfolio's public wallet addresses are viewable on the blockchain to provide maximum transparency and trust.

Hybrides Burning

21Million's hybrid burning is an innovative mechanism that drives supply scarcity. In addition to traditional token burning through transaction fees and redemptions, 21Million token holders have the unprecedented ability to independently burn tokens through the Portfolio Swap. Each 21Million token exchanged for a cryptocurrency from the Community Portfolio through the Portfolio Swap will be 100% burned. This allows token holders to actively contribute to reducing token supply and promotes the stability and value of 21Million.

Portfolio Swap

21Million's Portfolio Swap allows token holders to exchange their 21Million tokens for other cryptocurrencies from 21Million's community portfolio at any time. This provides token holders with trading flexibility and versatility, allowing them to benefit from the diversity of assets included in the portfolio. Each 21Million token swapped is 100% burned, which actively promotes supply scarcity and increases the value of 21Million. The portfolio swap provides a straightforward way to benefit from the assets in the community portfolio and contributes to the stability of the token.

Tokenomics

21.000.000

Max. Supply

8% / 8%
